Professional Summary

I am a full stack web developer highly proficient with modern full-stack JavaScript frameworks, .Net core and ASP.Net core. I have vast experience in implementing designs and building client side and server-side functionalities. I am highly skilled in developing user-facing features using modern frameworks, using feedback from users to improve the product and also building products that matches design and specified requirements. With over two years of experience, I have been able to architect and develop high fidelity websites and web apps, Collaborated with other designers and engineers to design, build, and ship new features from scratch.
