PROFILE SUMMARY

Experienced and top-performing Full-stack Developer with progressive experience developing customised IT software solutions for external clients, web service API integration and web-based applications. Excel in designing and developing intuitive full-stack enterprise web applications using various front-end and back-end skills such as HTML, CSS, JavaScript, PHP, MySQL database, MongoDB, and cloud platforms such as AWS EC2, Lambda, GCP. Knowledge of the software development life-cycle; ability to develop unit testing of code components or complete applications; experience working on various software development projects. Leverage technical, analytical, and problem-solving skills to create dynamic, high-speed websites, apps, and platforms fueling competitive advantage and revenue growth. Proactive team builder and tactical planner with the ability to attract and secure solid working relationships across organisational levels.

CORE COMPETENCIES

- Web & Software Development
- Programming Languages
- SDLC Project Delivery
- Applications Architecture
- User Requirements
- Network Administration
- IT Risk Assessment
- Quality Assurance
- System Migration
- Technical Architecture Design
- System Integration & Testing
- Full-Stack Development
- Data Interpretation
- Software Documentation

WORK EXPERIENCE

Full-stack Developer – Techstudio   **January 2023 - Present**

- Engage with inspiring designers and front-end engineers, and collaborate with leading back-end engineers to create reliable APIs.
- Designs visually appealing websites from scratch using react, vue, next and nuxt on the front end and node on the backend.
- Develops functional databases, applications, and servers to support websites on the back end.
- Introduces better collaboration tools and designs web applications to automate business processes workflow.
- Work within an Agile development process.
- Develop, Maintain and support Continuous Integration framework based on github actions to AWS and Digital ocean.
- Development of the company's internal CI system, providing a comprehensive API for CI/CD.

Backend Developer – Certgo   **December 2022 - Present**

- Work as the backend team lead and tasked with managing the backend architecture, solution design, quality assurance and maintenance.
- Collaborates closely with the frontend team to evolve and upgrade the web application to ensure greater user experience and application performance.
- Responsible for writing scalable and efficient APIs to manage users certificate collections using nodejs(expressJs) and MongoDb.
- Ensure database model design integration is patterned according user/client specifications and requirements.
- Ensures that non-functional requirements such as security, performance, maintainability, scalability, usability, and reliability are being considered when architecting solutions.

Backend Developer – HNG   **October -2022 - December 2022**

- Collaborated with a team to design a certificate generator; single handedly built APIs to handle CRUD operations on certificate collections and certificates.
- Improved operations by building an app to read CSV files and calculate the sha values for the items in the file.
- Worked closely with the Front-end Developers to integrate the application's user aspects with the logic on the server side.
- Designed and developed solutions following established frameworks, application development standards, and quality processes in projects.
- Solved three major issues by contributing to ZURI chat's open-source project.

Backend Developer – A.Jossy Multi-Project Limited   **February 2021 - August 2021**

- Managed incoming requests for updates and liaised with or delegated to other team members as necessary.
- Collaborated with the Dev team, producing project work plans and analysing the efficiency and feasibility of project operations while leveraging global technology stack and making localised improvements.
- Tracked, documented, and maintained software and network system functionality internally and externally, leveraging opportunities to improve engineering productivity.
- Engaged in software testing to identify defects early in the development process and ensure quality assurance.

Backend Developer Intern – Nigerian Armed Forces Resettlement Centre (NAFRC)   **April 2020 - February 2021**
- Worked with the IT team to ensure clean Live stream of occasional programs using software like OBS and Vmixpro.
- Oversaw the general repair and maintenance of Computer systems in the barracks.
- Liaised with the team of developers to create a hospital management system for the barrack's hospital and an admin management system for the barrack's headquarters using MYSQL database and PHP.
- Wrote analytical SQL queries for ICT personnels to handle requests for Information from the admin DBMS

EDUCATION

- **B. Eng Computer Engineering** – Federal University Oye-Ekiti   **2020**

TECHNICAL SKILLS

HTML & CSS	Node.js	MySQL Database
JavaScript	Express	Serverless
React.js & NextJs	PHP	AWS EC2 & Lambda
Vue & Nuxt JS	Laravel	Digital Ocean
Go Lang	MongoDB	Google Cloud Platform

CERTIFICATIONS

- Freecodecamp - JavaScript Algorithms and Data Structure (2023)
- Techstudio Academy - JavaScript Full Stack Web Development Professional (2022)
- Alison - Digital Network Security (2020)
- Alison - Information Technology Management (2020)
